FIN1209 Technical Analysis in Investment

Chapter 8 run card

Window Oscillators and Overlay Indicators, the second class

142 slides **12** checks, 24 items **25** figures **59** charts **6** parts

Benjamin C. Sotelo, Institute of Accounts, Business and Finance, FEU Manila

Read this before you open the deck

Where you should be, minute by minute

The honest number

The second class is 142 slides. At about 50 slides an hour that is **about 170 minutes in a 180 minute meeting**, so 10 minutes in hand. The build stops at 150 slides, so this class cannot grow past about 180 minutes. The rate was measured on Chapter 1, where 155 slides took the 180 minutes, so treat the clock as the test.

The clock

MINUTES PER SECTION, AND THE CLOCK TIME TO START IT

SECTION	SLIDES	MINUTES	START AT
Title, objectives, route	3	4	0:00
8.3 Cycle period, timeframes and lagging	26	31	0:04
8.4 Input data	11	13	0:35
8.5 Trend trading	8	10	0:48
8.6 Window oscillators	61	73	0:58
8.7 Overlay indicators and pivot points	21	25	2:11
8.8 Summary and review questions	12	14	2:36
Whole of the second class	142	170	ends 2:50

Slide counts include each check's question and its answer slide, and each section's divider.

At the boundary

RULE **Check the clock when 8.6 begins**

8.6 starts at slide `49` and is the longest section by far. **If you are more than five minutes behind at that slide, take the cut on page 2 before you begin 8.6.** Nothing from the book is cut: the cut is only the in-class checks.

Only the checks, never the book

What to cut, if you must

The ladder

WHAT THE CUT BUYS

CUT	WHAT COMES OUT	MINUTES	THE CLASS RUNS
None	The whole class		170
1	12 checks and their answers	29	141
2	and the review walk becomes assigned reading	11	130

Each check is two slides, the question and the answers. No slide that teaches a check's answer is cut.

The cut

Every check, question slide and answer slide, goes whole. Each check follows the slides that answer it, so no later slide refers back to one. The student edition has no checks at all. The second cut is the review question walk in 8.8, from slide `135` to the last slide: the questions are answered on slides the class has already seen, so they can be set as reading.

Skip these

The checks in 8.3 to 8.5

- Check 12, slides `16` and `17`: the half cycle.
- Check 13, slides `24` and `25`: timeframes.
- Check 14, slides `28` and `29`: leading and lagging.
- Check 15, slides `39` and `40`: the data drop-off effect.
- Check 16, slides `47` and `48`: trend trading.

Skip these

The checks in 8.6 and 8.7

- Check 17, slides `62` and `63`: ROC and MOM.
- Check 18, slides `69` and `70`: the MACD.
- Check 19, slides `77` and `78`: the ATR.
- Check 20, slides `87` and `88`: raw %K.
- Check 21, slides `97` and `98`: the stochastic.
- Check 22, slides `108` and `109`: stochastic and RSI together.
- Check 23, slides `129` and `130`: pivot points.

Below this, do not go

The floor, and the answers

The floor

All of the teaching slides stay. Every chart and every Lim figure in this class is the picture of the idea named on the slide with it, so cutting one leaves an explanation with nothing to show. Where a slide only names an idea, the next slide is its picture.

These stay

What must not be cut

1. **Tuning and timeframes**, slides `4` to `29`. Review question 7.
2. **Input data and trend trading**, slides `30` to `48`.
3. **The oscillators**, ROC, MOM, MACD and ATR, then the stochastic and the RSI, slides `49` to `109`. Review question 8.
4. **Overlays and pivot points**, slides `110` to `130`.

The answers

This card prints no check answers, on purpose. The repository this card lives in is public. The answers to all 12 checks, with the reason for each, are on the answer slide that follows each check in your copy of the deck, and in the teaching edition only.
