FIN1209 Technical Analysis in Investment

Chapter 8 run card

Window Oscillators and Overlay Indicators, Part A

140 slides **11** checks, 22 items **29** figures **54** charts **2** parts

Benjamin C. Sotelo, Institute of Accounts, Business and Finance, FEU Manila

Read this before you open the deck

Where you should be, minute by minute

The honest number

Part A is 140 slides. At about 50 slides an hour that is **about 168 minutes in a 180 minute meeting**, so 12 minutes in hand. The build stops at 150 slides, so this part cannot grow past about 180 minutes. The rate was measured on Chapter 1, where 155 slides took the 180 minutes, so treat the clock as the test.

The clock

MINUTES PER PART, AND THE CLOCK TIME TO START IT

PART	SLIDES	MINUTES	START AT
Title, objectives, route	3	4	0:00
8.1 Defining indicators and oscillators	62	74	0:04
8.2 Eight ways to analyze an oscillator	75	90	1:18
Whole of Part A	140	168	ends 2:48

Slide counts include each check's question and its answer slide.

At the boundary

RULE

Check the clock when 8.2 begins

8.2 starts at slide `66`. **If you are more than five minutes behind at that slide, take the cut on page 2 before you begin 8.2.** Nothing from the book is cut: the cut is only the in-class checks.

Only the checks, never the book

What to cut, if you must

The ladder

WHAT THE CUT BUYS

CUT	WHAT COMES OUT	MINUTES	PART A RUNS
None	The whole part		168
1	11 checks and their answers	26	142

Each check is two slides, the question and the answers. No slide that teaches a check's answer is cut.

The cut

Every check, question slide and answer slide, goes whole. Each check follows the slides that answer it, so no later slide refers back to one. The student edition has no checks at all.

Skip these

The checks in 8.1

- Check 1, slides `29` and `30`: the four kinds of overlay.
- Check 2, slides `46` and `47`: bounded and unbounded.
- Check 3, slides `55` and `56`: scale and trendlines.
- Check 4, slides `64` and `65`: static or dynamic.

Skip these

The checks in 8.2

- Check 5, slides `83` and `84`: overbought and oversold.
- Check 6, slides `89` and `90`: equilibrium crossovers.
- Check 7, slides `96` and `97`: collinearity.
- Check 8, slides `101` and `102`: signal line crossovers.
- Check 9, slides `114` and `115`: divergence.
- Check 10, slides `134` and `135`: patterns on an oscillator.
- Check 11, slides `136` and `137`: the eight ways.

Below this, do not go

The floor, and the answers

The floor

All of the teaching slides stay. Part A reads Lim's figures and our charts together, and every chart is the picture of the idea on the slide before it or beside it, so cutting a chart leaves an explanation with nothing to show. Lim's eight review questions are answered in Part B, which also closes the chapter.

These stay

What must not be cut

1. **The kinds of overlay**, slides `4` to `29`. Review questions 1 and 2.
2. **Bounded, unbounded and scale**, slides `33` to `55`. Review questions 3 and 4.
3. **Static and dynamic**, slides `57` to `64`. Review question 5.
4. **The eight ways**, slides `66` to `51`. Review question 6.

The answers

This card prints no check answers, on purpose. The repository this card lives in is public. The answers to all 11 checks, with the reason for each, are on the answer slide that follows each check in your copy of the deck, and in the teaching edition only.
