

Chapter 4 run card

Market Phase Analysis

79 slides 11 checks, 22 items 32 figures 18 charts 9 parts

Benjamin C. Sotelo, Institute of Accounts, Business and Finance, FEU Manila

Read this before you open the deck

Where you should be, minute by minute

The honest number

Chapter 4 is 79 slides. At the pace you actually taught Chapter 1, that is **about 136 minutes, and the session is 180**. It fits, with 44 minutes in hand, and nothing has to come out before you start.

One caution. The rate was measured on a deck with one thing on each slide. This deck puts a picture beside every idea and prices the slide as the two together, and that has not been timed in a room. **So the clock below is the test, and the cuts are here in case it runs slow.**

The clock columns

MINUTES PER PART, AND THE CLOCK TIME TO START IT

PART	SLIDES	FULL	START AT	LATEST START	CUT
Title, objectives, roadmap	3	3	0:00	0:44	3
4.1 Dow	20	35	0:03	0:47	32
4.2 Chart patterns	22	39	0:38	1:22	35
4.3 Volume	7	13	1:17	2:01	11
4.4 Moving averages	2	4	1:30	2:14	4
4.5 Divergence	5	9	1:34	2:18	7
4.6 Sentiment	5	8	1:43	2:27	8
4.7 Sakata	5	9	1:51	2:35	9
4.8 Elliott	2	4	2:00	2:44	2
4.9 Cycles	5	9	2:04	2:48	7
Closing	3	3	2:13	2:57	3
Whole chapter	79	136	ends 2:16	ends 3:00	121

Full is the deck with nothing dropped. Latest start is 44 minutes after Start at: begin a part later than that and the uncut deck ends past 3:00. Cut is the part with Cuts 1 and 2 taken. Slide counts include each check's question and its reveal.

At every part boundary

RULE

Check the clock against Latest start

If you begin a part after its Latest start, take Cut 1 before you begin it, not during it. It still buys 8 minutes at the start of 4.3. Cut 2 is for a session that starts late: its two checks are in 4.1 and 4.2. If neither is enough, stop at the end of 4.6, slide 64, and carry the rest. Page 3 has the detail.

What to cut, in this order

The ladder

WHAT EACH CUT BUYS

CUT	WHAT COMES OUT	MINUTES	CHAPTER	RUNS
None	The whole deck			136
1	Five second examples	9		127
2	Two checks	6		121

None of this is needed in a 180 minute session that runs to the rate. The last resort is on page 3 and is a stop, not a cut.

Cut 1

Five slides that show, on one more chart, a point the slides around them have already made. In this deck a picture sits beside its idea, so each of these goes as a whole slide, idea and picture together. No check and no review question rests on any of them, and no later slide refers back to one.

Skip these

Cut 1, five slides

- Slide 37, Figure 4.14, the rounding bottom as continuation. Figure 4.13 on slide 35 is the same point on a triangle.
- Slide 49, Figure 4.18, volume and phase on a real chart. The three schematics before it, slides 46 to 48, teach every line of it.
- Slide 56, Figure 4.23, bullish divergence in an accumulation. Slides 55 and 57 carry the section and the check.
- Slide 71, Figure 4.29, the wave count on gold. Slide 70 teaches the waves and the phases.
- Slide 74, Figure 4.32, the triangle in a price channel. Slide 73 shows its three roles on a cycle.

Cut 2

Two checks, and only these two. Each sits in a part that has three, so 4.1 and 4.2 still read the room twice each. Three minutes each. The slides that answer them stay: they carry review questions.

Skip both slides

Cut 2, two checks and their reveals

- Check 2, slides 18 and 19, reading a consolidation. Checks 1 and 3 read the room in 4.1.
- Check 6, slides 44 and 45, reversals and neutral patterns. Checks 4 and 5 read the room in 4.2.

Never

TRAP

Three things that are never a cut

Never drop a reveal without its question, or a question without its reveal. The letter alone teaches nothing.

Never drop a check in 4.3 to 4.9. Each of those parts has one check or shares one with its neighbour, and it is the only reading of the room there.

Never skip the first slide of a part. There are no divider slides: the first slide carries the book's section number and is how the room knows a part has started.

The last resort, and the floor

The carry

If Cuts 1 and 2 are not enough, stop at a part boundary and carry the rest. The clean stop is the end of 4.6, slide 64. Sections 4.7, 4.8 and 4.9 start at slide 65: Sakata, Elliott and cycles. They use what 4.1 and 4.2 taught, and nothing before them needs them.

Carry the three closing slides with them, slides 77 to 79. The summary and the review questions cover all nine sections, so they belong to the session that finishes the chapter. That is 25 minutes moved, uncut.

The floor

Seven groups of slides carry a check or one of the book's review questions. **They stay in at 136 minutes and they stay in at 121.**

These stay

What must not be cut, and why

1. **The two consolidations and who is on each side**, slides 5 to 12. Check 1, and review question 1.
2. **Tops, bottoms and the signs**, slides 15 to 17. Check 2, and review question 4.
3. **When a consolidation is over**, slides 20 and 21. Check 3.
4. **Consolidation patterns and intrinsic bias**, slides 25 to 30. Check 4, and review questions 2 and 3.
5. **Extrinsic bias, agreement and disagreement**, slides 33, 35, 36, 40 and 42. Checks 5 and 6.
6. **What each tool says about phase**, slides 47, 48, 54, 55, 57, 60 and 62. Checks 7, 8 and 9, and review questions 5, 6 and 8.
7. **Sakata, Elliott and the cycle**, slides 66, 70 and 72. Checks 10 and 11, and review question 7.

The answers

This card prints no check answers, on purpose. The repository this card lives in is public. The answers to all 11 checks, with the reason for each, are in your private answer sheet, which the deck build writes outside the repository:

```
~/FIN1209-Chapter-04-In-Class-Checks (answer sheet).md
```

Print that if you want the answers in your hand. This card is for the clock.
