FIN1209 Technical Analysis in Investment

Chapter 6 run card

Volume and Open Interest

136 slides **19** checks, 38 items **44** figures **44** charts **6** parts

Benjamin C. Sotelo, Institute of Accounts, Business and Finance, FEU Manila

Read this before you open the deck

Where you should be, minute by minute

The honest number

Chapter 6 is 136 slides. At the pace you actually taught Chapter 1, that is **about 238 minutes, and the session is 180.** It is 58 minutes over. Better to know that now than at the 90 minute mark.

Choose before you start. One session: take Cut 1 and Cut 2 from page 2 first, and the chapter runs 179. Two sessions: teach Parts 1 to 4 uncut, then stop and carry Parts 5 and 6 with the closing slides, 74 minutes. The rate was measured on a deck with one thing on each slide, and this deck prices a picture and its idea as the two together, so treat the clock as the test.

One session: the Cut columns

MINUTES PER PART, AND THE CLOCK TIME TO START IT

PART	SLIDES	FULL	START AT	CUT	START AT
Title, objectives, roadmap	3	4	0:00	4	0:00
1 Confirmation and divergence	24	43	0:04	34	0:04
2 Timing, VWMA, climaxes	23	42	0:47	30	0:38
3 Barriers and filtering	17	30	1:29	23	1:08
4 Open interest and breadth	26	45	1:59	34	1:31
5 Bar range and cycles	20	36	2:44	23	2:05
6 Volume oscillators	20	35	3:20	28	2:28
Closing	3	3	3:55	3	2:56
Whole chapter	136	238	ends 3:58	179	ends 2:59

Full is the deck with nothing dropped. Cut is the deck with Cuts 1 and 2 taken before you start. Slide counts include each check's question and its reveal. A row may be rounded up or down so the column adds up to the true total.

At every part boundary

RULE **Check the clock against the column you are running**

If you are more than five minutes behind at a part boundary, take whatever is left of Cut 1 before you begin the next part, not during it. Taken from Part 3 on, it still buys 24 minutes. If the session is two, stop at the end of Part 4, slide `93`. Page 3 has the detail.

For one session, take both before you start

What to cut, in this order

The ladder

WHAT EACH CUT BUYS

CUT	WHAT COMES OUT	MINUTES	CHAPTER RUNS
None	The whole deck		238
1	Twenty second examples	39	199
2	Seven checks	20	179

With both taken the chapter runs 179 minutes in a 180 minute session. In two sessions take neither.

Cut 1

Twenty slides that show, on one more chart, a point the slides around them have already made. Each goes as a whole slide, idea and picture together. No check and no review question rests on any of them, and no later slide refers back to one. The students keep them in the student edition and the lecture notes.

Skip these

Cut 1, twenty slides

- Part 1: slides `17`, Isis, and `25`, both kinds on one chart; slide `19`, which repeats Figure 6.6.
- Part 2: slides `31`, silver breakouts, `39`, blow-offs, `41`, our two levels, `42`, volatility, and `48`, our timeframes.
- Part 3: slides `60`, the three-sigma filter on a real chart, and `65`, the further channels.
- Part 4: slides `84`, the bearish TRIN day, `89`, 3M's traded range, and `91`, the four steps on 3M. Slide `90` teaches the steps.
- Part 5: slides `100`, `101` and `103`, three reversal bars on the dollar fund, and `109` and `110`, the EURUSD volume cycles. Keep `102`: Check 15 names it.
- Part 6: slides `118`, OBV on copper, and `128`, the Chaikin pair.

Cut 2

Seven checks, each in a part that keeps at least one other. Three minutes each, question and reveal together. The slides that answer them stay: they teach the chapter.

Skip both slides

Cut 2, seven checks and their reveals

- Check 1, slides `11` and `12`. Part 1 keeps Checks 2 and 3.
- Check 6, slides `49` and `50`. Part 2 keeps Checks 4 and 5.
- Check 8, slides `61` and `62`. Part 3 keeps Checks 7 and 9.
- Checks 10 and 12, slides `73`, `74`, `85` and `86`. Part 4 keeps Checks 11 and 13.
- Check 15, slides `105` and `106`. Part 5 keeps Checks 14 and 16.
- Check 18, slides `125` and `126`. Part 6 keeps Checks 17 and 19.

Below this, do not go

Two sessions, and the floor

Two sessions

To teach the chapter uncut, stop at the end of Part 4, slide `93`, and carry the rest. Parts 5 and 6 start at slide `94`: bar range, volume cycles and the volume oscillators. Part 6 uses Part 1's two kinds of volume oscillator and Part 4's open interest, so it must come after them, never before.

Carry the three closing slides with them, slides `134` to `136`. The summary and the review questions cover all six parts. The first session runs 164 minutes and the carry 74.

The floor

Twelve groups of slides carry a kept check or one of the book's eight review questions. **They stay in at 238 minutes and they stay in at 179.**

These stay

What must not be cut, and why

1. **Bullish and bearish volume**, slides `6` to `10`. Review question 2.
2. **Divergence and confirmation**, slides `13` to `16`. Check 2, review question 3.
3. **The two kinds of oscillator**, slides `22` to `24`. Check 3.
4. **Timing and climaxes**, slides `28`, `29`, `37` and `40`. Checks 4 and 5, review question 4.
5. **Barriers**, slides `51` and `53`. Check 7.
6. **Filtering**, slides `56` to `64`, except `60`. Check 9, review question 5.
7. **Relative volume and open interest**, slides `68`, `75` and `76`. Check 11, review questions 6 and 7.
8. **Tick volume and two-dimensional volume**, slides `81`, `87` and `90`. Check 13, review question 1.
9. **The named bars**, slides `95` to `97`. Check 14.
10. **Volume cycles and the time axis**, slides `108` and `111`. Check 16, review question 8.
11. **The OBV**, slides `115` and `116`. Check 17.
12. **The Chaikin pair and the Herrick index**, slides `127` and `130`. Check 19.

The answers

This card prints no check answers, on purpose. The repository this card lives in is public. The answers to all 19 checks, with the reason for each, are in your private answer sheet, which the deck build writes outside the repository:

`~/FIN1209-Chapter-06-In-Class-Checks (answer sheet).md`
