

Chapter 3 run card

Mechanics and Dynamics of Charting

188 slides **23** checks, 46 items **40** figures **6** charts **6** parts

Benjamin C. Sotelo, Institute of Accounts, Business and Finance, FEU Manila

Read this before you open the deck

Where you should be, minute by minute

The honest number

Chapter 3 is 188 slides. At the pace you actually taught Chapter 1, that is **about 219 minutes, and the session is 180**. It is heavier than Chapter 2, mostly because the book gives this chapter forty figures, and it does not fit as it stands.

The rate is measured, not guessed: 155 slides of Chapter 1 is what 180 minutes bought. Every minute below is Chapter 3's own mix of slides priced at that rate.

Read the last two columns

MINUTES PER PART, AND THE CLOCK TIME TO START IT

PART	SLIDES	FULL	START AT	CUT	START AT
Openers and roadmap	4	5	0:00	5	0:00
1 OHLC	26	30	0:05	25	0:05
2 Significance and gaps	22	26	0:35	21	0:30
3 Constant measures	38	45	1:01	38	0:51
4 Scaling	29	32	1:46	24	1:29
5 Bid-ask spread	22	26	2:18	22	1:53
6 Futures	43	50	2:44	39	2:15
Wrap up	4	5	3:34	5	2:54
Whole chapter	188	219	ends 3:39	179	ends 2:59

Full is the deck with nothing dropped. Cut is the same deck with Cuts 1, 2 and 3 from pages 2 and 3 all taken before you start. Slide counts run from the part divider to the recap, which is what the progress marker counts.

At every part boundary

RULE

Check the clock against the column you are running

If you are more than five minutes late starting a part on the Cut column, you have no cut left to take. **Stop at the end of Part 5 and carry Part 6.** Do not cut inside a part; that is how a session ends in the middle of an argument.

The other way to run it

Parts 1 to 5 uncut, with the openers and the wrap up, are 169 minutes. If you would rather keep every figure, chart and check, run those and carry Part 6 whole to the next session. Part 6 is futures, and it is the one part that is self contained: nothing in Parts 1 to 5 depends on it. **Either way, run the four wrap up slides at the end.** They carry the eight review questions.

What to cut, in this order

The ladder

WHAT EACH CUT BUYS

CUT	WHAT COMES OUT	MINUTES	CHAPTER RUNS
None	The whole deck		219
1	Eleven repeat pictures	10	209
2	All six charts, and eight slides	12	197
3	Six checks	18	179

In a 180 minute session all three come out before you start. Cut 3 is on page 3, with what must never go.

Cut 1

Eleven pictures that repeat a picture or a slide you have already shown. Nothing is lost but the second telling. Each one is under a minute.

Skip these

Cut 1, eleven figures

- Slide 21, Figure 3.3. Eight intervals; Figure 3.2 already builds a bar.
- Slide 75, Figure 3.13. Figure 3.15 shows a Renko chart too.
- Slides 98 and 116, Figures 3.17 and 3.23. Figure 3.18 and the overlay slide make both points.
- Slides 110 and 114, Figures 3.20 and 3.21. Figures 3.19 and 3.22 carry each pair.
- Slide 148, Figure 3.30. The slide before it carries the point.
- Slide 161, Figure 3.34. Simple contango is on the slide before it.
- Slides 167 and 168, Figures 3.36 and 3.37. The natural gas slide says it.
- Slide 177, Figure 3.39. Figure 3.40 shows the mechanism already.

Cut 2

Every chart, and eight slides that restate their neighbour or name something the chapter never examines. No check needs any of them. The charts are ours and only illustrate a term already taught.

Skip these too

Cut 2, six charts and eight slides

- All six charts: slides 43, 59, 71, 79, 96 and 176.
- Slide 10, the data families. The notes carry the full list.
- Slide 49, the Chapter 5 gap names.
- Slide 56, overlays. Part 4 teaches them again.
- Slide 87, the summary. Every line is on a term slide.
- Slide 92, the list. The three terms follow it.
- Slide 147, continuous volume. The notes carry it.
- Slide 150, month codes. Nothing is set on them.
- Slide 181, the summary. The three terms carry it.

Below this, do not go

The third cut, and the floor

Cut 3

Six checks, and only these six. Each sits beside another check in the same part, every part keeps at least two, and the seventeen left still put a check after every few terms. Three minutes each.

Skip both slides

Cut 3, six checks and their reveals

- Check 1, slide 11, chartists. Check 2 in Part 1 reads the room.
- Check 6, slide 50, what gaps do. Check 5 sets the gap types.
- Check 11, slide 88, the constant measure. Checks 7 to 10 set each chart.
- Check 13, slide 105, choosing a scale. Check 12 sets the two scales.
- Check 17, slide 132, buying at support. Check 16 sets the fill problems.
- Check 21, slide 169, convergence. Check 20 sets contango and backwardation.

Never

TRAP

Two things that are never a cut

Never drop a reveal without its question, or a question without its reveal. The letter alone teaches nothing.

Never drop a term slide. Every check is answered by a term or content slide before it, and the student edition has no speaker notes to fall back on.

The floor

Seven things carry a check or a past paper item. **They stay in at 219 minutes and they stay in at 179.**

These stay

What must not be cut, and why

1. **OHLC and higher timeframe bars**, slides 14 and 19. Checks 2 and 3, and review question 1.
2. **What the four prices mean**, slides 32 to 37. Check 4; the high as supply is a past paper item.
3. **The four gaps**, slides 40 to 42. Check 5, and a past paper item.
4. **The constant measures**, slide 54 and every term after it in Part 3. Checks 7 to 10, four past paper items, and review question 4.
5. **Scaling**, slides 93, 94, 107, 108 and 113. Checks 12, 14 and 15, and three past paper items.
6. **The spread**, the four term slides from 121 to 129, and 134. Checks 16 and 18, and review question 7.
7. **Futures**, every term slide in Part 6, from 144 to 180. Checks 19, 20, 22 and 23, and six past paper items.

One more

The answers to all 23 checks are in `chapter-03/in-class-checks.md`, generated from the same content as the deck. **Print that, not this.**
